## Andrea Roggi Creativeness Studio

MONUMENT IN HONOUR OF ROBERTO BENIGNI

The concept of a monument to honour the actor Roberto Benigni was conceived in 1977 and became a reality with its inauguration in 1999. It has been supported by the community of Manciano, the home of this great artist. Standing at 4.5 metres high, this bronze covered stone statue is a homage to life and creativity. It is situated in our 'Park of Creativity', which is constantly expanding to exhibit new works.

ANDREA ROGGI'S 'CREATIVITY STUDIO'

This 'Creativity Workshop' serves as a meeting place for artists in which they can express themselves through bronze, stone and precious metals.

The Park is located in the heart of the Valdichiana, Tuscany between Arezzo and Cortona and is therefore the perfect geographical location for an appreciation of art.

The underlying theme of Andrea's work is the exploration of the human soul, essentially laying bare not only internal struggle with its inherent disappointments but also a sense of hope, pride and liberation communicated through a vibrant and universal philosophy.

Andrea's works are expressions of perception and mystery through form, the hallmark of his creative genius and are inspired by a long standing tradition of Tuscan artists beginning with Cimabue and continuing to the present day.
